2. SETTING GOALS

I would now like to discuss your main goals for participating in the TeleFFIT program. We have noted that you set some goals when completing the online questionnaire. I would now like us to discuss these goals, including short-term goals (for the next 2-4 weeks), medium term goals (for the next 3 months) and your long-term goals (for the 12-month program) *NB. Client goals should be SMART (Specific, Measurable, Achievable, Relevant, Time-bound) and include behaviour related goals and not just outcome focused where possible.*

2.1 What are your **short-term goals** for the next 2-4 weeks?
How do you expect to achieve these goals (e.g., list specific days or times you might exercise)?

2.2 What are your **medium-term goals** (e.g., for the next 3 months) with regards to the TeleFFIT exercise program? How do you expect to achieve these goals?

2.3 What are your **long-term goals** (e.g., for the 12 months) with regards to the TeleFFIT exercise program? How do you expect to achieve these goals?

4. SETTING UP HOME ENVIRONMENT

It is important that you set up your exercise station safely for this program

4.1 Can we discuss or you show me where you would like to exercise at home?

- Clear space (at least 3m²) clear of any hazards
- Make sure a sturdy chair or tabletop/bench is within arms' reach
- Best to keep your tablet / smart device at eye level
- Place step / foam on a non-slip surface
- Make sure you have a phone nearby and/or somebody else knows you are exercising
- Wear appropriate loose-fitting clothes
- Wear training shoes (runners), not barefoot or only socks
- You should not exercise if you're not feeling well due to a cold, flu or other medical condition
- If you experience any of the following symptoms during or after exercise, stop and get medical advice immediately (call 000 if needed): dizziness/light headedness, chest pain, irregular/rapid/fluttery heartbeat, difficulty breathing, nausea, severe leg ache.
- If you have diabetes and experience the following, then stop and get medical advice immediately: shakiness, tingling lips, weakness, irregular or rapid heartbeat, or if developing an ulcer.
- It's normal for your muscles to be sore after exercise, and particularly early on in your program the soreness could last for up to a week, this is called DOMS (Delayed Onset of Muscle Soreness). If the discomfort persists for more than 2 weeks then please let me know.

Client is ready to exercise at home safely:

- Yes**
- No, needs further follow up**

4.2 Equipment provided (briefly explain each):	<input type="checkbox"/> Step <input type="checkbox"/> Balance pad <input type="checkbox"/> Fitness mat <input type="checkbox"/> Dumbbells (set up for client)	<input type="checkbox"/> Theraband set <input type="checkbox"/> Fabric resistance band set <input type="checkbox"/> Other (specify)
---	---	---

Do you have issues with your internet connection? Yes No

4.3 If yes, check participant's internet speed at <https://www.speedtest.net/> and advise to contact their provider. Download Mbps _____ Upload Mbps _____

8. Schedule / Confirm Video Health Coaching Consultations

Together we will have 10 video consultations throughout the study using Zoom. Let's schedule / confirm the date and time of your first 2 consultations.

8.1	Week 2 consultation: Date _____ / _____ / 20_____ Time _____ : _____ AM / PM via Zoom / Phone / _____
8.2	Week 4 consultation: Date _____ / _____ / 20_____ Time _____ : _____ AM / PM via Zoom / Phone / _____
8.3	Run participant through using Email/Zoom/Phone/App to: <input type="checkbox"/> Contact their EP throughout program <input type="checkbox"/> Video calls with their EP/Dietitian

9. Complete Activity Agreement

What plans will be put in place to help the client adhere to the TeleFFIT program and achieve their goals? (*Plan in terms of context, frequency, time of day, days per week*)

ACTION PLAN: EP to summarize action plan for the daily activity snacks and 'Strong, Steady & Straight' program. This will form the basis for the exercise agreement with the client.

- Photo taken
- Copy given to client

10. Final Checklist for EPs (Tick when completed)

- Provide an overview of the TeleFFIT exercise program requirements.
- Discuss the concept of the Strong, Steady and Straight exercise program & training requirements.
- Review your client's health, medical and lifestyle history.
- Collaboratively define your clients short and long-term exercise goals using SMART principles.
- Review potential barriers & facilitators to exercise participation & discuss strategies to overcome them.
- Review home environment to ensure it is safe to exercise
- Explain the exercise equipment pack
- Set up adjustable dumbbells for client
- Ensure that the TeleHab exercise app is installed and operating properly for your client.
- Instruct your client on how to use the TeleHab app and its other features.
- Check or ask if your client's internet speed/access is reliable.
- Assign your client their first exercise program and run through their program focusing on correct technique and safety.
- Discuss days / times your client plans to exercise (and set up the reminder notifications).
- Discuss with your client how they will integrate the weight-bearing 'activity snacking' activities into their daily routine and instruct them how to perform the activity.
- Discuss with your client the importance of trying to incorporate some additional (1-2 sessions) aerobic activities (e.g., brisk walking) into their weekly schedule. Highlight that this will be encouraged from week 17 of the study.
- Schedule/confirm the 2 two follow-up consultations (week 2 and 4)
- Complete and sign TeleFFIT activity agreement
